# HOISTABLE LIGHTS

THE LOPOLIGHT HOISTABLE LIGHTS

New LED and optics system – similar to the rest of the Lopolight range. The new version is easier to work with, as the cable detaches.

The lights will maintain their alignment – and not 'capsize' due to the longer distance between top and bottom.
The lights also have rubber bumpers to protect the vessel.
The range is complete from the single anchor light, the N.U.C or R.A.M. chains – and even the

Suez Canal 'Christmas tree' strings. To maintain chafe protection and good looks the power cable is hidden inside the interconnection ropes. As usual for Lopolight the lights are fully potted, IP68 waterproof and vibration proof. The lights integrate perfectly to the Lopolight Navigation Light Controller system.

NEW AND IMPROVED
